EXPERIENCE

Google Developers Groups, Dharmsinh Desai University – Nadiad – AI/ML Team Member

Year 2025 - PRESENT

Work on ML concepts, model building, and AI focused technical activities.
Participate in project based learning and technical interviews.

DUHACKS 5.0 Hackathon, Nadiad – Organizer team

Year 2025

Helped organize a National level hackathon focused on technology and innovation. Coordinated teams, event flow, and technical logistics. Worked closely with developers and mentors to ensure smooth project evaluation.

Smart India Hackathon, Participant

Year 2025

Conceptualized an innovative AI-powered solution for precise train traffic control, addressing the problem of maximizing section throughput and minimizing train delays in a high-traffic environment.

EDUCATION

Dharmsinh Desai University, Nadiad, Gujarat – Bachelor of Technology (BTech) in Computer Engineering – CPI - 9.32

Year 2024 - Year 2028

Sharda Mandir School, Nadiad – HSC – 91% , SSC – 94%

Year 2024

PROJECTS

Student Data Analysis Dashboard

The AI-Powered Student Data Analysis Dashboard is a Flask web app that analyzes and visualizes student data using machine learning. It offers filtering, clustering, success prediction, and a chatbot that lets users query the data in natural language.

Fake News Classifier

Fake News Classifier is a machine learning project that predicts whether a news headline or text is real or fake using TF-IDF and Logistic Regression. It includes a Streamlit app where users can paste text and get a prediction with confidence in real time.

Ad-Astra

Ad-Astra is a dynamic astronomy website that lets users manage and display astronomy events using full CRUD operations.

Argus Transaction Monitoring System (Currently working)

ARGUS is a secure web-based system that monitors financial activities and helps identify suspicious transactions for fraud prevention and compliance.

SKILLS

Programming Languages: C, Python (Advanced), C++, Java

AI/ML Frameworks: PyTorch, Scikit-learn, Keras

Data Science: Pandas, NumPy, Matplotlib, Seaborn, SQL, Feature Engineering, EDA, Handling missing & Imbalance data, Data cleaning & preprocessing

Tools & Platforms: Git, Github, Google colab, Kaggle, Jupyter Notebook, VS Code, Linux(Basic commands)

Concepts: Machine Learning, DBMS, DSA, Software Engineering Principles(Basics)

Soft Skills: Problem-Solving, Leadership, Adaptability, Teamwork & Collaboration

Achievements

UCMAS – Merit Rank

JEE Mains – 92.75 percentile and Qualify for JEE Advanced

GUJCET – 98.93 Percentile Rank

LANGUAGES

English, Gujarati, Hindi, Learning German(Duolingo)

Certifications

Intro to Programming
Intro to Pandas
Intro to Machine Learning
